GPS Tracking

OUR SERVICES

Live Public Map – The live map shows the current location of all vehicles on route. Vehicle locations are updated every few seconds. Route and vehicle icons are color-coordinated for easy identification.

Mobile App – The mobile app includes route information, vehicle locations, ETAs, important announcements, and viewing of multiple routes simultaneously based on the users location. It is available for both iOS and Android platforms.

Text Message Alerts – Text message alerts allow users to receive a reply text with bus arrival time estimates within seconds of sending the request text.

Administrative Map – The administrative map provides fleet managers access to monitor all vehicles.

Live Display Monitors – Prominently displayed monitors allow transit riders to easily see vehicle locations, route information, and announcements.

Dispatch Notification – The dispatch notification feature allows dispatchers to send on-demand jobs to drivers through their mobile device. Drivers can accept and report the status of the job dispatched.

Custom Reporting – From vehicle location and speed history to on-time performance, our custom reporting allows users to receive the reports they want and need, when they need them.

Client Feedback – The client feedback feature allows riders to send instant feedback to their transit agency through the mobile app or public website.

THE RIDE SYSTEMS DIFFERENCE
